Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

Calculus - Wikipedia

In mathematics, matrix calculus is a specialized notation for doing multivariable calculus, especially over spaces of matrices. It collects the various partial derivatives of a single function with respect to many variables, and/or of a multivariate function with respect to a single variable, into vectors and matrices that can be treated as single entities.

Lesley, Pre-MBA candidate, Summer 2010 This was my first online class, so I really had no clue what to expect. To say I was happily surprised is an understatement. I have never been a strong student when it comes to math, and this class was so clear and easy to follow that I felt I understood the concepts exceptionally well.
