Pipeline supports two syntaxes, Declarative (introduced in Pipeline 2.5) and Scripted Pipeline. Both of which support building continuous delivery pipelines. Both may be used to define a Pipeline in either the web UI or with a Jenkinsfile, though it's generally considered a best practice to create a Jenkinsfile and check the file into the source control repository.

Using a Jenkinsfile

25 VMware Interview Questions: Tough & Technical (PDF)

Retrospect is a family of software applications that back up computers running the macOS, Microsoft Windows, Linux, and classic Mac OS operating systems. It uses the client-server backup model, which means there must be a backup server application running on one computer and small-footprint client applications running on the other computers being backed up in either a single platform or mixed ...

Retrospect (software) - Wikipedia

When deploying the vCenter Server Appliance (VCSA), there are a set default network ports that are already pre-defined by VMware. It is generally recommended to stick with these defaults unless you have a really good reason to modify them.

How to change the default ports on the vCenter Server

Web scraping, web harvesting, or web data extraction is data scraping used for extracting data from websites. Web scraping software may access the World Wide Web directly using the Hypertext Transfer Protocol, or through a web browser. While web scraping can be done manually by a software user, the term typically refers to automated processes implemented using a bot or web crawler.
