

### **basic trauma life support pdf**

Basic life support (BLS) is a level of medical care which is used for victims of life-threatening illnesses or injuries until they can be given full medical care at a hospital. It can be provided by trained medical personnel, including emergency medical technicians, paramedics, and by qualified bystanders.

### **Basic life support - Wikipedia**

Advanced trauma life support (ATLS) is a training program for medical providers in the management of acute trauma cases, developed by the American College of Surgeons. Similar programs exist for immediate care providers such as paramedics. The program has been adopted worldwide in over 60 countries, sometimes under the name of Early Management of Severe Trauma, especially outside North America.

Trauma-informed care could be described as a framework for human service delivery that is based on knowledge and understanding of how trauma affects people's lives and their service needs (Harris & Fallot, 2001). This requires consideration of a person's environment beyond the immediate service being provided and of how their symptoms and presentations may be seen as
