Historically, the chemical engineer has been primarily concerned with process engineering, which can generally be divided into two complementary areas: chemical reaction engineering and separation processes. The modern discipline of chemical engineering, however, encompasses much more than just process engineering.

Biomedical Engineering (BME) or Medical Engineering is the application of engineering principles and design concepts to medicine and biology for healthcare purposes (e.g. diagnostic or therapeutic). This field seeks to close the gap between engineering and medicine, combining the design and problem solving skills of engineering with medical biological sciences to advance health care treatment ...

Overview. NIOSH conducts research on engineering control solutions for reducing exposures to air contaminants and on physical hazards such as noise and non-ionizing radiation. The engineering control research focuses on identifying, developing, and assessing practical, solutions-oriented interventions that reduce occupational exposures to air contaminants.
