Chemicool - Periodic Table of Elements and Chemistry

The periodic table, or periodic table of elements, is a tabular arrangement of the chemical elements, ordered by their atomic number, electron configuration, and recurring chemical properties, whose structure shows periodic trends. Generally, within one row (period) the elements are metals to the left, and non-metals to the right, with the elements having similar chemical behaviours placed in ...

This is a puzzle that encompasses much of what is learned in middle school and high school about the periodic table including energy levels, the different families and groups, along with other specific traits of different elements. Instead of the traditional symbols of the periodic table, they are replaced with arbitrary letters and must fill in a blank periodic table with those new letters ...

Although the mathematical basis of quantum chemistry had been laid by Schrödinger in 1926, it is generally accepted that the first true calculation in quantum chemistry was that of the German physicists Walter Heitler and Fritz London on the hydrogen (H_2) molecule in 1927. [citation needed] Heitler and London's method was extended by the American theoretical physicist John C. Slater and the ...
