- For many Excel users, writing formulas, creating formulas, one of the most common things they do. In this worksheet called Formulas, in the workbook Creating Formulas and Functions, we need some formulas in row 4, also over in column H and column I. Formulas many times are straightforward, simple, easy to use, but they start with a different concept than you might be familiar with.

Creating simple formulas - lynda.com

Creating a formula in a table automatically causes the formula to be copied down the column. Table formulas include the field name (the column header) automatically unless you type specific cell addresses. Although unwieldy, table formulas provide better documentation and eliminate unnecessary formula copying.

Using formulas in tables - lynda.com

Hi, If you are familiar with mathcad, there is a great general beam solution file available at Mathcad's civil engineering user forum. The file's name is "F_D_BEAM.MCD" and it can solve almost any type of beam with various boundary conditions.
