

complex variables applications 6th pdf

A complex number is a number of the form $a + bi$, where a and b are real numbers and i is an indeterminate satisfying $i^2 = -1$. For example, $2 + 3i$ is a complex number. A complex number may therefore be defined as a polynomial in the single indeterminate i , with the relation $i^2 + 1 = 0$ imposed. From this definition, complex numbers can be added or multiplied, using the addition and ...

Complex number - Wikipedia

Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...
