My research focus on design and implementation of programming abstractions in areas that have included real-time embedded systems, concurrent and distributed systems and more recently scalable data analytics.. I have published in venues that specialize in Programming Languages, Virtual Machines, Compilers, Software Engineering, Real-time Computing, and Bioinformatics.

Computer science is the theory, experimentation, and engineering that form the basis for the design and use of computers. It involves the study of algorithms that process, store, and communicate digital information. A computer scientist specializes in the theory of computation and the design of computational systems.. Its fields can be divided into a variety of theoretical and practical disciplines.

The erlang (symbol E) is a dimensionless unit that is used in telephony as a measure of offered load or carried load on service-providing elements such as telephone circuits or telephone switching equipment. A single cord circuit has the capacity to be used for 60 minutes in one hour. Full utilization of that capacity, 60 minutes of traffic, constitutes 1 erlang.

Oracle acquired Sun Microsystems in 2010, and since that time Oracle's hardware and software engineers

have worked side-by-side to build fully integrated systems and optimized solutions designed to achieve performance levels that are unmatched in the industry. Early examples include the Oracle Exadata Database Machine X2-8, and the first Oracle Exalogic Elastic Cloud, both introduced in late 2010.
