This article presents 8 different types of tools you can use to create a documentation of your existing databases. In short, they are: Word Processor

8 Different Types of Tools You Can Use to Document your

“English spoken, American understood” is a sign I saw once hanging in a Scottish pub. It sums up the “English question” quite nicely, which is this article’s topic.. How many people speak English? With 375 million native speakers and 1.5 billion total speakers English is by far the most widely spoken language in the world and as such has become a lingua franca for international business.

Comparison of different SQL implementations. The goal of this page “ which is a work in progress ” is to gather information relevant for people who are porting SQL from one product to another and/or are interested in possibilities and limits of 'cross-product' SQL.. The following tables compare how different DBMS products handle various SQL (and related) features.

Software documentation is written text or illustration that accompanies computer software or is embedded in the source code. It either explains how it operates or how to use it, and may mean different things to people in different roles. Documentation is an important part of software engineering. Types of documentation include:
