In physics, the law of conservation of energy states that the total energy of an isolated system remains constant, it is said to be conserved over time. This law means that energy can neither be created nor

destroyed; rather, it can only be transformed or transferred from one form to another.

Surface tension can be defined in terms of force or energy. In terms of force: surface tension  $\hat{F}^3$  of a liquid is the force per unit length. In the illustration on the right, the rectangular frame, composed of three unmovable sides (black) that form a "U" shape, and a fourth movable side (blue) that can slide to the right.
