environment variable for my pdf
An environment variable is a dynamic-named value that can affect the way running processes will behave on a computer.. They are part of the environment in which a process runs. For example, a running process can query the value of the TEMP environment variable to discover a suitable location to store temporary files, or the HOME or USERPROFILE variable to find the directory structure owned by ...

The natural environment encompasses all living and non-living things occurring naturally, meaning in this case not artificial.The term is most often applied to the Earth or some parts of Earth. This environment encompasses the interaction of all living species, climate, weather and natural resources that affect human survival and economic activity. The concept of the natural environment can be ...

1.1 What is Bash? Bash is the shell, or command language interpreter, for the GNU operating system. The name is an acronym for the â€˜Bourne-Again SHellâ€™, a pun on Stephen Bourne, the author of the direct ancestor of the current Unix shell sh, which appeared in the Seventh Edition Bell Labs Research version of Unix. Bash is largely compatible with sh and incorporates useful features from the ...
