Flood frequency analysis Flood frequency analysis involves the fitting of a probability model to the sample of annual flood peaks recorded over a period of observation, for a catchment of a given region.

Flood Frequency Analysis Using the Gumbel Distribution

A one-hundred-year flood is a flood event that has a 1% probability of occurring in any given year.. The 100-year flood is also referred to as the 1% flood, since its annual exceedance probability is 1%. For river systems, the 100-year flood is generally expressed as a flowrate.

The River Avon / ˈævən / is an English river in the south west of the country. To distinguish it from a number of other rivers of the same name, this river is often also known as the Bristol Avon. The name "Avon" is a cognate of the Welsh word afon, "river".. The Avon rises just north of the village of Acton Turville in South Gloucestershire, before flowing through Wiltshire.
