Dialectical behavior therapy (DBT) is an evidence-based psychotherapy designed to help people suffering from borderline personality disorder (BPD). It has also been used to treat mood disorders as well as those who need to change patterns of behavior that are not helpful, such as self-harm, suicidal ideation, and substance abuse. This approach works towards helping people increase their ...

Dialectical behavior therapy - Wikipedia

Musical memory refers to the ability to remember music-related information, such as melodic content and other progressions of tones or pitches. The differences found between linguistic memory and musical memory have led researchers to theorize that musical memory is encoded differently from language and may constitute an independent part of the phonological loop.
