The law of the United States comprises many levels of codified and uncodified forms of law, of which the most important is the United States Constitution, the foundation of the federal government of the United States. The Constitution sets out the boundaries of federal law, which consists of acts of Congress, treaties ratified by the Senate, regulations promulgated by the executive branch, and ...

NEW € EURAM Grants. EURAM Grant Scheme. Call for Applications: EURAM Grants Scheme announcement. One of EURAM's aspiration is to support rigorous and relevant research in the field of business and management, with implications and relevance to the European research community.

EURAM

In economics, an input€output model is a quantitative economic technique that represents the interdependencies between different branches of a national economy or different regional economies. Wassily Leontief (1906€1999) is credited with developing this type of analysis and earned the Nobel Prize in Economics for his development of this model.
