PEDIATRIC FEVER. Fever in a child is a common emergency department presentation. About 20% will have fever without an identifiable source, and a small but significant number of these children will have an occult, serious bacterial infection (SBI) (1). UTIs are the most common occult SBI (2), especially in children

Introduction. The Roter Interaction Analysis System (RIAS) is a computer-based methodology that permits to characterize the communication resulting from the interaction between health professionals and patients. 1 The RIAS was initially based on the work of Robert Bales (1950) which, in the 1970s, was transposed to the investigation of the communication in medical consultations.
