well, with the sole purpose of finding oil. The Drake Well was located in the middle of quiet farm country in northwestern Pennsylvania, and sparked the international search for an industrial use for petroleum. Photo: Drake Well Museum Collection, Titusville, PA These wells were shallow by modern standards, often less than 50 meters deep, but they produced large quantities of oil.

Although the problem of well spacing is one of the most important involved in the production of oil, it must be considered at the present time as still subject to further development. The published literature on this question is so voluminous that we cannot enter here into a review of it, except to refer to the recent papers by L. L. Foley and E. A. Stephenson, where other references are cited.
