Finally, some protists move using flagella. These are simple, whip-like structures that propel the protist through its environment. Explain ways protists move.

It's So Simple: Kingdom Monera (Bacteria) - mrscienceut.net

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.
