Students who take the AP Chemistry course, designed with this curriculum framework as its foundation will develop a deep understanding of the concepts within the big ideas through the application of the science practices in the required laboratory component of the course.

AP Chemistry Course Details - College Board

Syllabus Course Schedule. Mathematical Biology Links. Mathematical Biology Journals in College of William and Mary library and network. Lecture Notes. Chapter 1: Derivation of reaction-diffusion equations (14 pages) Chapter 2: Diffusion equation on a bounded domain (22 pages) Chapter 3: Diffusion with point source (8 pages) Chapter 4: Nonlinear scalar reaction-diffusion equations (38 pages)

Math 490 PDE and Math Biology - College of William & Mary

Introduction. A master equation is a phenomenological set of first-order differential equations describing the time evolution of (usually) the probability of a system to occupy each one of a discrete set of states with regard to a continuous time variable t . The most familiar form of a master equation is a matrix form: $\hat{\alpha}' = \hat{\alpha} \Gamma$, where $\hat{\alpha}'$ is a column vector (where element i represents state i ...

How to Make Chemical Solutions. Simple chemical solutions for cleaning messes can be made easily at home or at work in a number of different ways. Whether you are making a solution out of a powdered compound or diluting a liquid solution,...

4 Ways to Make Chemical Solutions - wikiHow

Arrhenius' equation gives the dependence of the rate constant of a chemical reaction on the absolute temperature, a pre-exponential factor and other constants of the reaction. $k = A e^{-\frac{E_a}{RT}}$ Where k is the rate constant; T is the absolute temperature (in kelvin); A is the pre-exponential factor, a constant for each chemical reaction. According to collision theory, A is the frequency of collisions in the ...
