1. Read each question carefully, including diagrams and graphs. 2. For multiple-choice questions, choose the best answer from the four choices given.

### **End of Course (EOC) Practice Test: Washington State - Geometry**

The missing square puzzle is an optical illusion used in mathematics classes to help students reason about geometrical figures; or rather to teach them not to reason using figures, but to use only textual descriptions and the axioms of geometry. It depicts two arrangements made of similar shapes in slightly different configurations. Each apparently forms a  $13 \times 5$  right-angled triangle, but one ...

I had not found much formal analysis out there on the web, but through the LiveWire site I was able to contact Dr. Richard Hess, who has compiled a self-published Compendium of Over 10500 Wire Puzzles. This fantastic resource has drawings in schematic form of many tanglement puzzles, categorizes them, and formalizes some solution strategies.
