

### **the risk agent risk pdf**

strategy for dealing with risk. At its core, human risk management is the ability to keep all people who are involved in the business safe, satisfied and productive. Human risk can be summarized into four main categories: 1) Human health and well-being; 2) Family and business relationships; 3) Employee management; and, 4) Transition planning.

### **Introduction to Risk Management**

that the agent engages in risk-taking wherever the contract makes his utility convex in output. In so doing, the agent makes his expected utility concave in intermediate output.

(1970) and Kadane and Winkler (1988) show that when the principal compensates the agent according to the quadratic scoring rule, risk-averse agents tend to overestimate the degree of uncertainty of the event. This paper departs from the assumption that the agent seeks to maximize expected payments.

### **Probability Elicitation for Agents with Arbitrary Risk**

• Sensitive risk groups need to be taken into account e.g. those that are young, pregnant or breastfeeding.  
• Consider how others apart from the users could be affected.

contract that makes the agent's utility concave in output. If the agent is risk-neutral and protected by limited liability, optimal incentives are strikingly simple: linear contracts maximize profit. If the agent is risk averse, we characterize the unique profit-maximizing contract and show how deterring risk-taking affects the insurance-incentive tradeoff.

### **Optimal Contracts with a Risk-Taking Agent**
